HD VidCap USB Camera with TIMS Patient Management Software
Designed to empower physicians with the visibility & mobility they need

The add-on HD VidCap USB Camera System makes recording video and taking still images easy and convenient. Simply couple to your flexible or rigid endoscope, plug the camera into the USB port on your PC or laptop and you are ready to go. It adds a new dimension of functionality to your endoscope, aiding in diagnosis by colleagues.

The easy to use, reliable and efficient TIMS Patient Management software includes patient database for visit comparison, image annotation, report creation for easy sharing and audio and video recording.
